Summary

Founding designer with 13+ years building brand and product together, from zero to launch. I co-founded Kaizen, a marathon training app that grew to 30,000+ downloads, with 10,000 in year one on €0 marketing, and lifted trial-to-paid conversion by 10.9%. I also designed SuitePad's in-room hotel AI, used by 32% of guests. I now run Studio Vincent, shaping brand and product for early-stage founders. The thread that binds my work is conversational, story-led design, starting with your team, customers and the unique creative direction we find together. With AI, interaction is an open field, where I make your brand resonate at every moment and your product astounding by design.

Experience

Founder, Designer & Creative Director Studio Vincent Berlin 2026 to present

Independent practice working with founders and product teams on brand identity, product design, and creative direction.

- Linro: brand identity, strategy, and product design, giving invisible security infrastructure a visual language built around lineage, from the wordmark through to the interface and the terminal.
- Monet: brand identity and product design, creating a desirable consumer brand for neuro tech people would actually want to wear.

Co-founder & Founding Designer Kaizen Berlin November 2022 to April 2026

Co-founded Kaizen, a marathon training app that grew from 0 to 30,000+ downloads. I owned brand, product UX, the design system, copy, and creative direction across the full experience.

- Built the Kaizen brand from scratch around simple, minimal illustration, and kept it consistent across the app, the website, landing pages, and social campaigns.
- Redesigned the feed and dashboard so users could move through their training timeline instead of seeing a fixed day-by-day view. Trial-to-paid conversion went up 10.9%, and the work seeded our training systems product.
- Rebuilt onboarding as a guided first run rather than a setup checklist. This changed how we thought about notifications, defaults, and retention.
- Reached 10,000 downloads in year one on €0 marketing spend, through posts in Strava groups and members sharing the app.
- Built and maintained the design system across iOS and Android, including editorial voice and copy guidelines & accessibility standards

Freelance Product Designer SuitePad Berlin 2024

Designed the on-device AI and voice experience for SuitePad's in-room hotel tablets. Took it from early concept through to production patterns shipped on device. 32% of guests used SuitePad AI during their stay, with an average session time of 3:59, above SuitePad's benchmark for city hotels.

- Designed the conversational interface across voice, text, and touch, from how guests first encounter the AI to suggested questions and edge cases like slow responses and Wi-Fi issues.
- Built reusable templates connecting AI responses to hotel content, services, and offers, including contextual cards, upsell opportunities, and confirmation flows.

Product Design Lead (B2B) Gastfreund GmbH Berlin 2019 to October 2022

Led product design across a seven-product B2B suite for the hotel industry, working with a 40-person engineering and product team.

- Rebranded and redesigned the legacy product family (dashboards, CMS, web editors, media library) and built the design system across all seven products.
- Led research with hotels using remote feedback, prototype testing, and diary studies. Ran weekly design sprints so research findings landed in delivery.
- Cut onboarding time for new digital guest maps by more than half, working closely with the content team to understand their workflows and frustrations with the existing tools.

Selected Freelance & Earlier Roles

Founder & Researcher Make.garden 2020 to 2022

Researched artists' needs, bootstrapped a software product sold to UK universities, and co-authored an academic paper.

Product Designer Infarm 2018

Mobile-first UI for internal software used by Infarm staff to monitor produce health.

Product Designer AJ&Smart Berlin 2017
Guest designer on consumer design sprints, including the E.ON rollout.

Founder A Door For London 2012 to 2015
Founded an Airbnb for creative use of space, leading product, brand and operations.

Location Scout Freelance UK 2008 to 2013
Scouted UK locations for Philomena, Danny Boyle films, Google and Burberry.
